UNIT - I

PRESIDENTIAL

ADDRESS

A. Answer the following questions :-

1. What progress has India made in the fifty years since the Independence?

Ans:- India is known for its unity and diversity and has always fought for its independence which it has finally achieved.

Courage is what you can earn when you have been through tough times and you finally discover that they aren't so tough after all.

Firstly, talking about medicines and medical treatments, India has the cheapest and best medicines and medical facilities for diseases like Cancer. People come for treatment of such diseases in India.

During Independence, the British tried to take away all the glories of India like the spices, cereals etc as of now, India is self-sufficient in food production.

One bright mind can think, two bright minds can bring a change, many bright minds can bring a revolution. People in India believe in this.

During these 50 years, India has developed many aspects like food, production, health sector, higher education, media and mass communication etc.

Now if we observe, there are many IT industries. Most of the people are being educated to get good jobs.

Though India is rich in natural resources, a number of people are below poverty and there is no proper food security.

India has started many revolutions like Green Revolution, White Revolution etc. which has helped the country in achieving a good result in the recent past.

Q. What are the problems which continue to plague the nation?

Ans: India is a developing country but, there are few obstacles that hinder our country's development.

Population which is regarded as a strength but also a weakness. Due to increase in the population, there is a lack of resources provided to people. Unemployment, poverty, illiteracy are some
